WORK EXPERIENCE

Frontend Developer Intern (Remote)

Nov 2023 - Feb 2024

Inenergyup Innovation Hub - Lagos, Nigeria.

- Collaborated with a team of Frontend developers, backend developers and Product designers to develop a fintech and agro-e-commerce web application for a startup.
- Implemented Frontend technologies like Reactjs, Tailwind CSS in the development of the web application
- Increased the productivity level by 60% thereby facilitating the fast development of the application.

PROJECTS

Fundcraft - A multi faceted fintech web app with banking, loan and Messaging integration. Reactjs, Tailwind CSS, Next.js, MongoDB

Agro Cart - An e-commerce web application that helps connect farmers to the consumers. This is my research project as a software engineering student. Python, Flask, Reactjs, Vanilla CSS.

Portfolio Website - A personal website with detailed information about the projects I have worked on, technical skills and experiences. HTML, CSS and JavaScript.

AirBnB Clone (version 1-4) - This is a clone of the popular Airbnb web app. It is a comprehensive online platform that facilitates short-term lodging and tourism. HTML, CSS and JavaScript.

Duty Dashboard - Duty Dashboard is a versatile to-do list app that helps users stay organized and manage their tasks effectively. Reactjs, HTML, CSS
